

IVF and surrogacy

YOUR DREAM - OUR SPECIALITY!

Helping International Families to fulfill the happiness of parenthood since 2013.

LOCATION

Slovakia, Albania, Ukraine, Mexico and Georgia are not only countries where you can safely become a parent, but these are also beautiful countries with rich traditions and tourist attractions, so the waiting time becomes more and more pleasant for the future parents.

Flights to these countries are relatively inexpensive, and high-class accommodation is affordable. Cities in these countries are worth a visit because of the fancy restaurants, shopping spots, well-thought art-deco subway stations, museums and churches.

These favorable features make Slovakia, Albania, Ukraine, Mexico and Georgia popular destinations for foreigners seeking surrogacy services instead of going for the service in their own country or other places.

WHY CHOOSE IVF AND SURROGACY WITH IFG

Established relationships with proven IVF clinics

We work with the most advanced IVF clinics in Ukraine, Albania, Georgia and Slovakia which are officially certified by the Ministry of Health. IVF and Surrogacy programs have been successfully conducted at these clinics since 2005, and, during this period, 820 cycles were done and 603 happy children were born.

10 years of experience working with leading medical centers

Assuta Hospital, Shamir Medical Center (Assaf Harofeh), Herzliya Medical Center, Hadassah Hospital are among our trusted partners.

Huge choice of egg, sperm donors and surrogate mothers

Our database includes more than 350 egg donors, 200 sperm donors and 120 surrogates.

Affordable IVF and Surrogacy treatment programs

From standard to guaranteed infertility treatment packages.

Flexible online consultation schedule and individual patient care

We are available for private IVF and surrogacy consultations via Skype or at our office. Personal coordinator from the first minutes of contact, speaking English, French, Spanish, German.

IVF and Surrogacy lawyer support

IFG has attorneys on staff to help with your legal work and insurance. We will take care about a temporary travel document / passport for the child that will ensure safe and successful return of the whole family home.

Proven Pregnancy success rate

Our egg donation program boasts proven pregnancy rates, with a cumulative clinical pregnancy rate of: - 64% after the first attempt; - 77% after the second attempt; - 91% after the third attempt.

IFG's experienced team has achieved the highest success rates in Europe, providing the best possible outcome for our patients.

Aneuploidy screening of embryos before implantation

Aneuploidy screening of embryos for all 24 chromosomes before implantation has been shown to boost pregnancy success and reduce the risk of miscarriage. Notably, FET after PGS can achieve high implantation rates (75%), pregnancy rates (80%), and live birth rates (77%)

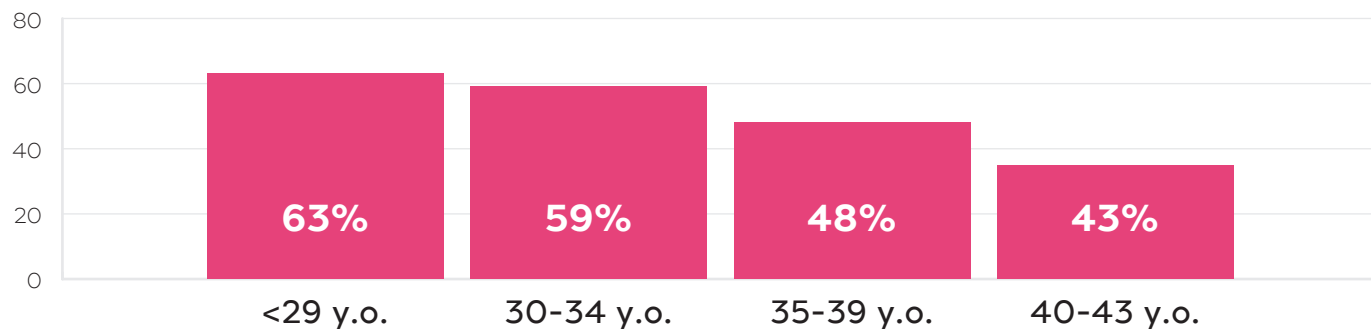

Mitochondrial donation for many couples as unique solution to have own biological child

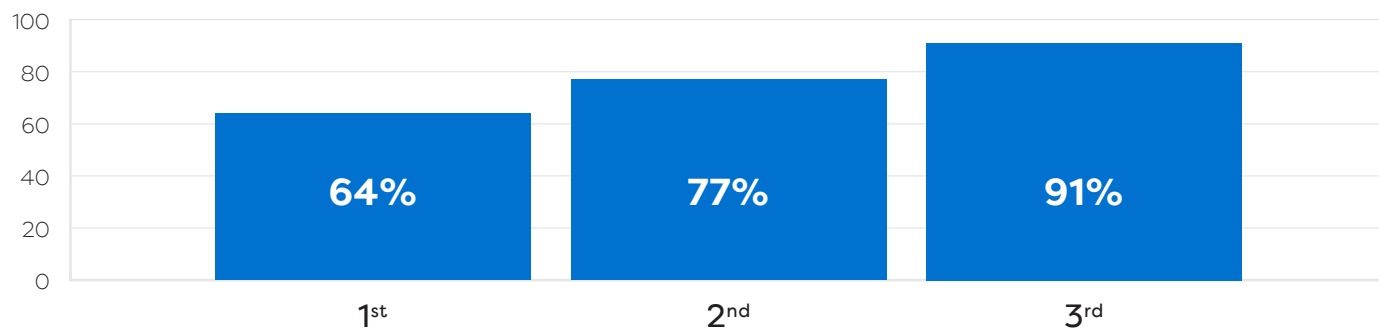

For many couples and those recommended for oocyte donation, mitochondrial donation presents a unique solution for conceiving a healthy biological child.

- ✓ Surrogacy with Egg donor oocytes
- ✓ Guaranteed Surrogacy program with Donor oocytes

IVF AND EGG DONATION AT IFG

Egg donation is an assisted reproductive treatment which involves an in vitro fertilization (IVF) with eggs from a donor. Egg donation frequently benefits women who cannot use their own eggs for various reasons, including ovarian failure, avoiding congenital anomalies in the fetus, or advanced age. As such, oocyte donation makes the miracle of life possible for women who would not be able to have children any other way.

PROGRAMS:

- Standard IVF+ICSI with own eggs
- Frozen egg donation program
- Fresh egg donation program
- Combined program (own IVF cycle + Frozen egg donation)
- Double donation program (Egg and sperm donation)
- Guaranteed egg donation program (minimum 4 embryos for ET)
- Frozen embryo transfer
- Embryo donation

Unique services and alternatives to egg donation

Mitochondrial donation program:

- Pronuclear transfer
- Spindle transfer

- PGD 5 Chromosomes Test FISH method (incl. X,Y) (Up to 10 embryos)
- Cryopreservation of surplus embryos
- Storage of embryos

EGG DONORS

IFG collaborates with **Ovogene**, which is the first AI-driven egg donor bank in the world. **Ovogene** offers a unique service known as **Genetically Certified Oocyte® technology**.

Oocyte NGS Screening is performed on donor oocytes, determining aneuploidy of the oocytes via a first polar body biopsy. This technology increases the probability of becoming pregnant from the first attempt*.

Ovogene only offers euploid oocytes, allowing clients to have certainty about the genetic potential of all oocytes.

All donors are rigorously screened, undergo a detailed medical diagnosis, genetic testing and psychological consultation for the safety of our patients. You just need to select and book your favorite egg donor from **Ovogene** online egg donor catalog.

*Numerous factors can influence pregnancy success rates, including egg quality, sperm quality, the experience of the embryologist, patient's health conditions, and lab equipment. We guarantee that the quality of eggs is appropriate to achieve a successful pregnancy, but we cannot take responsibility for other independent factors.

CRYOSIPPING

ARK Cryo is our international partner that specializes in cryoshipping for assisted reproduction.

ARK Cryo is an international transportation company that specializes in cryoshipping for assisted reproduction. They transport human reproductive cells for fertility clinics and individual IVF patients. ARK Cryo is based in Cyprus, ensuring that all cryo deliveries are made according to IATA standards and EU-Tissue Directive 2004/23/CE, 2006/17/EC and 2006/86/EC.

- Due to their extensive experience with biomaterial transportation **in more than 80 countries**, they are experts in transporting frozen eggs (oocytes), sperm and embryos, as well as medical records, documents and all manner of laboratory specimens.
- **ARK Cryo** knows that all shipments contain clients' most important medical materials, and they believe in delivering the cryomaterials by hand, safely and on time, every time.
- **ARK Cryo** is dedicated to helping their clients solve their fertility issues and successfully start a family. They are one of the world's most trusted transporters of frozen donor embryos, as well as donor eggs and sperm.
