

SURROGACY + EGG DONATION

with 2 embryo transfers

Stage of the program

What is included

1st STEP

Contract signing

At the first stage, patients are provided with information on the program, legal information, and information on the organization of the whole process. A search and testing for a surrogate mother in accordance with the legislation of the country. Patients are also provided with complete information on the process and offered a consultation with a lawyer.

2nd STEP

Performed
embryo transfer

The second stage includes the preparation of the intended parents and the egg donor for embryo creation. This includes egg collection, oocyte fertilization by the ICSI method, the process of embryo creation, the preparation of the surrogate mother for the embryo transfer, all medical processes that correspond to this stage, and the procedure of embryo transfer. Compensation for the surrogate mother and financing for her medications.

3d STEP

12 weeks of
pregnancy

The third stage includes HCG testing of the Surrogate, pregnancy confirmation on the 6th and 9th week ultrasound scans, complete medical support, and primary genetic testing (PRISCA I and PRISCA II). This step also includes the Surrogate mother's compensation (food, accommodation, and clothing up to approximately 20 weeks of pregnancy).

4th STEP

24 weeks of
pregnancy

This stage includes the complete medical support of the surrogate mother, her accommodation in separate apartments from the 20th week of pregnancy, and compensation. Support of the surrogate mother 24/7.

5th STEP

30 weeks of
pregnancy

During the 5th step funds for the last stage are directed to the organization of childbirth, accommodation and compensation of the surrogate mother, and medical support.
